

## **Remote Sensing Service Areas:**

AMTRON's Remote Sensing services meet the highest international standards for satellite/aerial image processing, land use classification, high accuracy DEM extraction from stereo images etc, employing innovative techniques in the RS field.

- DEM Extraction
- Orthorectification
- Pan sharpening
- Image Mosaicing
- Atmospheric corrections
- Color Enhancement/LUT editing
- Tiling of the Image Mosaic
- Impervious feature extraction
- Documentation files creation
- Image Classification etc,
